

Dear Generations Owners,

First and foremost, we would like to thank all of you for the support of the Generations family of products. Lately, we have heard many concerns from you about the issue of continued support and development from Notcina Corporation.

Notcina Corporation is still continuing development on the Generations automatic digitizing software and multi-needle embroidery machinery. The Generations Software conceptual and programming development team is fully aware of the new technology that is changing in computer systems, so in turn, our team is staying current with the ever-changing technology.

We welcome any comments or questions that you may have about the software to be addressed to our educational department. We are looking forward to our further development of our products and hope you share in the excitement.

Please keep checking the website for new updates and announcements. We value your patronage and are looking forward to provide you outstanding new products.

Sincerely,

Notcina Corporation
